

# CPOMS for Sports Clubs

Empowering Sports Clubs to Uphold and Enhance their Safeguarding Initiatives

## What is it?

CPOMS software supports your club's systems and processes that work to monitor Player safeguarding, mental health, pastoral and welfare concerns.

The software is highly intuitive so staff can easily log incidents, causes for concern and notes - all in one simple, easy-to-use form. As information is entered, a player's chronology is automatically constructed so you can see a clear picture with little effort. The cloud-based software provides a secure, centralised way to store and access sensitive data from any device with an internet connection.

## Why is it Important?

CPOMS software helps lessen the burden on staff to record and manage concerns, prepare reports and perform other administrative duties. Clubs can quickly gain efficiencies whilst focusing on the wellbeing of players. When it comes to inspections, CPOMS software helps clubs confidently demonstrate their Safeguarding systems and processes that work to protect players and that exercise urgency in referring to the appropriate agencies, whilst providing clear, effective and secure record-keeping.

## Highlights

### Streamline the Process

Drastically simplify safeguarding tasks, including secure data sharing, governance reporting, and more, freeing staff to focus on players.

### Connect the Dots

Bring all the bits of information together in a secure, centralised place to see a chronology emerge early on of a child in need of help.

### Improve Outcomes

Leverage the power of CPOMS to see clearly where help is needed and pave the way for all players to thrive.

## Key Features

### Chronology

View a time-ordered narrative through the chronology. Also, record information about adults at risk. Functionality across any device that supports the internet allows staff to record concerns and incidents for players in training or during a tournament.

### Tournament & Event Recording

Useful when recording safeguarding incidents on match day and during events. When dealing with different agencies such as the Police and Emergency Services the ability to upload the incident directly into CPOMS is a great benefit. Easily pull a report to send to Sports Organisations and National Governing Bodies.

### Customisation

Tailor CPOMS software to meet your club's exact needs, including categories of concern, user roles and permissions, input forms and alerts. This helps ensure an effective, easy-to-use tool for Coaches, DSLs and Academy Directors.

### Role-based Access

The enterprise-level permissions system allows each club to uniquely control which members of staff can access each type of sensitive information.

### Audit Controls

All incidents, actions and key transactions performed in CPOMS are time, date and user-stamped. Consequently, an audit trail is maintained that accurately records all key activities undertaken using the system. Now you can track and analyse what has been done, by whom and when.

### Reporting

Easily prepare reports for management and club officials, provide evidence for external audits and compliance, and statistical breakdowns highlighting individual concerns or trends.

## About Us

Used by more than 18,500 Establishments in 68 countries **globally**, CPOMS is the market-leading software for monitoring Safeguarding, wellbeing and all pastoral issues.

*"As a professional sports club, CPOMS has been invaluable in helping us capture essential safeguarding and welfare information across all areas of our business. CPOMS has allowed us to record incidents and identify trends ensuring we provide timely and appropriate interventions whilst maintaining the required levels of confidentiality."*
